***Double Patenting***

1. Claims 1-17 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-11 of U.S. Patent No. 6,626,945. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 1-17 of the application recite the same inventive cartilage plug as is the claims 1-11 of U.S. Patent No. 6,626,945. All the claims in both application and patent call for a bridged cartilage plug device for insertion into a void in cartilaginous tissue in a living mammal, comprising a continuous upper surface and a plurality of anchoring elements extending therefrom.

***Allowable Subject Matter***

2. Claims 18-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***
